After the horrible attacks of September 11th I believe that this country needs to start uniting and supporting American based companies. We need to return honor to this nation not litigation. Our success is necessary on all fronts especially technology.

Hopefully, the court and the DOJ will back Microsoft in settling this political case once and for all. It would be nice to see the competitors all unite to start working on great technology instead of trying to create legal smoke screens to fog great visions for our future. Long live the American freedom to work hard and succeed not hire a lawyer. Please settle this mess and let Microsoft get on with it.

Thank you for your time.
